**ADDITIONAL INFORMATION SUPPORTING NJD** (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite):

Isolated wetlands on site are likely the result of failed section of agriculture tile and/or potholes. I walked completely around all of the sites and concluded there were no surface water connections to these wetlands. The sites were all less than 0.2 acres and, as such, did not support navigation or other interstate commerce. Four other waters/wetlands of the US were located on site, all were connected to an unnamed ditch in the SE corner of the property that flows into Stoney Run.
